Nathan,

Please find attached USAID input.

Thank you,

Madelynne Brazile

Interagency colleagues,

Under the G20 Energy Sustainability Working Group (ESWG), the Saudis are seeking comments on several "outcomes documents," including the **Forward-looking Options for Enabling Pathways for Universal Access to Energy**. Please find attached DOE's initial edits on the draft. We would appreciate your review and comments, if any.

To ensure a timely response back to KSA, please send any edits, comments, or suggestions by noon tomorrow, Thursday, July 30. We will integrate your comments and send to KSA.

A couple points from our side:

- KSA's doc is something we can support. It emphasizes our messaging on diversity of supply, all-fuels all-technologies and stronger data to inform policy makers.
- We have made edits per NSC guidance to limit SE4All's lead role among IOs.
- Pages 21 – 30 have placeholders for G20 efforts on Universal Energy Access. We left those areas blank as we suspect that Saudi's will input our submission from a couple weeks ago.

Please let me know if you have any questions.

Best,

Nathan
